

FIRE PREVENTION

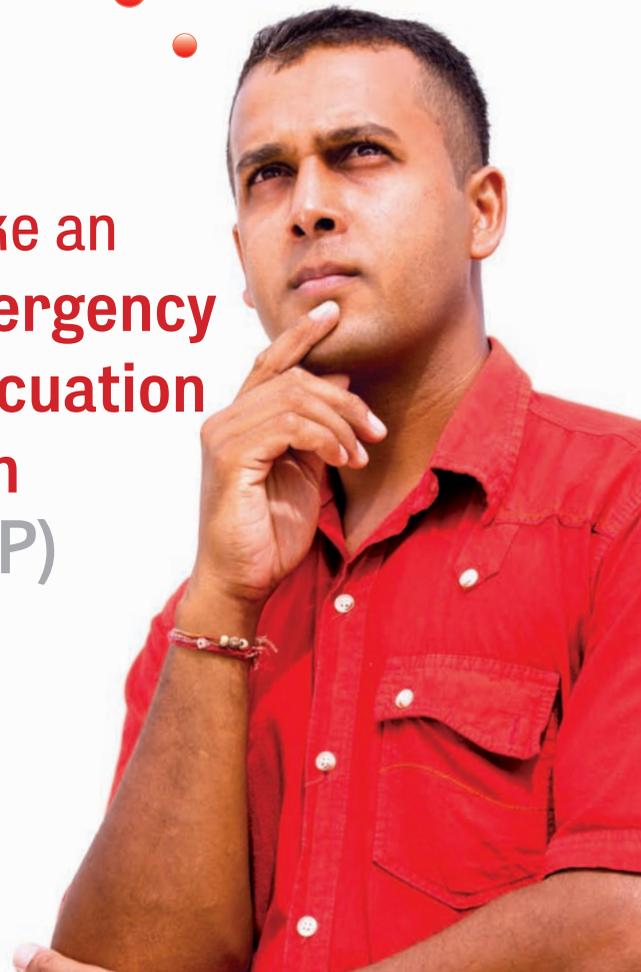

Home Safety

IN CASE OF FIRE,
CALL THE FIRE
SERVICE ON

115

Make an
Emergency
Evacuation
Plan
(EEP)

TAKE EVERY ONE INTO ACCOUNT

- Spend a few minutes thinking about how you'd get out if there was a fire.
- What would you do if your main escape route was blocked? Would everyone know what to do? Make sure you know the basic procedure for when there is a fire.
- It might be an idea to pin up the basic plan on the wall, especially if people often drop in or come to stay.
- Your best escape route is your normal way in and out of your home.
- Decide on a different route as well, in case the normal one is blocked
- Keep all escape routes clear

KNOW WHERE THE KEYS ARE KEPT

- Agree with everyone you live with where keys of door are to be kept and keep them there.
- You can be safe as well as secure if anyone who has needs to get out in an emergency can easily open doors and windows
- You need to be able to find the door or window keys in a hurry.

WHEN IT IS SAFE TO STAY IN YOUR HOME

- If your escape route is blocked, it may be safer to stay inside and protect yourself until rescue personnel arrives
- If the stairs in a flat are blocked by fire or smoke, do not use lift. Stay calm and go back inside your flat. And try to attract attention to people outside.

PRACTICE YOUR EEP (EMERGENCY EVACUATION PLAN)

- Knowing what to do and acting quickly will save lives
- Regularly take a few minutes to 'walk' the escape route with everyone in your household and check that everyone can unlock and open doors and windows easily.
